

## ***Login/Logout Instructions ELITE PCATD v8.0***

### **To Login:**

- Enter your user name in the [**Pilot**] box (select from list), type in your password and press [**Login**]. If the [**Login**] button is not active, then either your user name is not on the list or the password does not match.
- You can also select an instructor, but they have to enter their password as well before you can login.

\*\*\*\***IMPORTANT**\*\*\*\* If the computer locks up or "crashes" while you are flying, you **MUST** reboot the computer immediately and run the program again to log out. You are still considered "logged in" at this point and the machine thinks that you are still flying. (i.e., the Hobbs meter is still running).

- Once you have exited the sim, you have 15 minutes to either log in again or log out. This is to give you the ability to stop the Hobbs meter and take a break (dry off your sweaty palms, grab a drink, etc.). If you take no action during this time, the program will automatically log you out.

### **To Logout:**

- Record the current meter, flight hours, and amount due in the Ops Log and press [**Logout**]. Place your check or credit card receipt in the gray box.
- If you press [**Login**] again, you will re-enter the sim and can select another aircraft to fly.

### **To Create a New User:**

- Only users currently in the list can create a new user. Have the new user enter their desired username and password in the [**Pilot**] row, then have a current user select their name and enter their password in the [**Instructor**] row. Press [**Create**] to add the new user to the list.
- User names must be 5-20 characters long and passwords must be 4-8 characters long (no spaces).

### **To Change Your Password:**

- Select your name in the [**Pilot**] box and the [**Instructor**] box. Enter your current password in the instructor row and the new password in the pilot row and press [**Change**].

As always, if you have any questions or would like to schedule a demo, please contact **Eric Archer** at **858-945-3553** or **eric.archer@noaa.gov**. Enjoy!!!
